# OUR GOAL IS TO GIVE YOU GREATER PEACE OF MIND.

## SELECTED CAPABILITIES

### INFOSEC Risk Analysis

Our INFOSEC Risk analysis support system uses proprietary software coupled with our INFOSEC consulting service. INFOSEC analysis helps you determine all the elements of network security risk and gives you the ability to manage that risk.

INFOSEC Risk support solution provides a detailed network security survey that—

- examines hardware, software and the user environment
- analyzes over 4,500 security risks to determine vulnerability levels
- assesses the impact of vulnerabilities
- provides an easy-to-understand report with specific action items aimed at correcting and improving security

### Network Penetration Testing

The network penetration testing service provides a comprehensive assessment of your external network perimeter and internal network segments.

Our network penetration testing solution provides—

- intrusive and non-intrusive testing
- analyzes and evaluates network entry and exit points
- determines security weaknesses in external and internal firewalls, and intrusion detection systems
- provides a user-friendly report that details findings, recommendations and supporting evidence

## INFOSEC STRATEGY & POLICY DEVELOPMENT

Building on our experience in hardware, software and human factors, SBR's INFOSEC Risk Technologies division can equip your company with the expertise to develop superior INFOSEC strategies and policies.

INFOSEC Risk Technologies also provides specialized training to combat corporate espionage and counter-intelligence, and enhance personal privacy and information protection.

## WHY CHOOSE SBR?

The information on your network is critical to the success of your business. But networks can be complicated—both in terms of software requirements and the people who run them. That's why you can't trust critical security audits to just anyone?

SBR's INFOSEC Risk Technologies offers you an unmatched portfolio of solutions that allows you to enhance the security of your information. We can meet your security needs—no matter how complex your network.

***We provide diagnostic and prescriptive services and work with clients to implement solutions.***
